SKILLS

Technical Skills

- Programming Languages: C#, JavaScript,
- Frontend Development: React, HTML5, CSS3, SASS, Bootstrap, Material-UI
- Backend Development: ASP.NET MVC, .NET Core, Node.js, Express.js
- Databases: SQL Server, MongoDB, MySQL
- API Development: RESTful APIs,
- Version Control: Git, GitHub

Soft Skills

- Problem-Solving: Strong analytical skills to debug complex issues and optimize performance.
- Communication: Excellent at collaborating with cross-functional teams and stakeholders.
- Adaptability: Quick learner who adapts to new technologies and frameworks.
- Project Management: Proficient in Agile methodologies, task prioritization, and meeting deadlines.

CERTIFICATES & COURSES

MERN Full Stack Development

- CS50's Introduction to Computer Science - Harvard University
- CS50's Web Programming with Python and Javascript - Harvard University
- Introduction to MERN Stack - Simplilearn
- MERN Stack fundamentals - GreatSimple
- React Native Course - FreeCodeCamp
- Javascript Essentials 1 - Cisco Networking Academy

EDUCATIONAL ATTAINMENT

Pamantasan ng Lungsod ng Maynila
Bachelor of Science in Computer Engineering
CUM LAUDE
2020 - 2024

TECHNICAL PROJECTS

Manning Agency Website

GitHub Repository Link: [Avior Marine Website](#)

- Developed a manning agency website for Avior Marine Inc using React.js and SASS, featuring home, about, job listings, services, and contact pages for streamlined user experience.

Smart Parking Mobile App with Hardware Integration

GitHub Repository Link: [Smart Parking GitHub Repository](#)

- Developed a Smart Parking mobile app with real-time integration to Firebase and Arduino IDE, providing live updates on parking space availability.
- Leveraged a robust technical stack, including React Native, Firebase SDK, and Arduino IDE, to create a seamless connection between the digital platform and physical sensor data for efficient parking management

Smart Parking Mobile App with Hardware Integration

GitHub Repository Link: [iAqua: Real-Time Monitoring Application](#)

- Developed a Real-Time Monitoring mobile app using React Native, with seamless integration to Firebase for backend support and Arduino IDE for live sensor data updates in my aquarium.
- Included features such as scheduled and automatic feeding, water change management, a chatbot for user interaction, and comprehensive history logs for detailed tracking of aquarium conditions

WORK EXPERIENCE

zerohash - Technical Support Engineer

November 2025 - Present

zerohash - Jr. Technical Support Engineer

February 2025 - November 2025

Avior Marine Inc - Jr. Software Developer

January 2024 - January 2025

Asterisko Artisan - Technical Support

April 2023 - March 2024

Freelance - Full Stack Software/Mobile Developer

January 2022 - Present
